BEST SELLING SEG PROFILE SOLUTIONS

Popular profile options for non-lit frames, lightboxes, hanging displays, and freestanding applications.

#15 & #19 1-SIDED ECONOMY NON-LIT SEG FRAME

- Best for wall-mounted non-lit SEG displays
- Depth: #15 – 5/8" | #19 – 3/4"
- Stock lengths up to 18.5' uncut
- Unlimited sizing with butt-join capability
- #15 available in Silver
- #19 available in Silver, Matte Black, and Gloss White
- Designed for non-lit SEG fabric graphics
- Low-profile design for clean wall presentations
- Economical shipping and easy assembly
- Wall-mount brackets available

#27 – 1-SIDED NON-LIT SEG FRAME

- Best for wall-mounted or hanging non-lit SEG displays
- Depth: 1-1/16”
- Stock lengths up to 18.5’ uncut
- Available in Silver, Matte Black, and Gloss White
- Our most versatile 1-sided non-lit SEG profile
- Heavy-duty hardware available for secure installations
- Corner stabilizers and support bars available for larger frames
- 180° connectors support unlimited size expansion
- Knock-down construction allows for easier transport and shipping
- Built-in groove accommodates support bars and hanging hardware
- Compatible with acoustic panel applications

#44 & #45 2-SIDED NON-LIT SEG FRAME

- Designed for freestanding, hanging, or wall-mounted applications
- Depth: 1-3/4"
- Stock lengths up to 18.5' uncut
- Available in Silver, Matte Black, and Gloss White
- Compatible with slim flat feet or vertical support feet for freestanding displays
- Corner hardware and support bars available for larger builds
- Ceiling-hanger compatible for suspended installations
- Knock-down design supports economical shipping and transport
- External groove accommodates select accessories
- #45 is identical to #44, but without the outside groove

#79, #80 & #81 SEG FRAME

- Designed for freestanding or hanging display applications
- Depth: #79 and #80 – 3-1/8" | #81 – 3-3/8"
- Stock lengths up to 18.5' uncut
- #79 and #80 available in Silver and Matte Black, #81 available in Silver
- #80 is a 2-sided multi-channel profile for SEG graphics
- #79 is identical to #80, but without the outside groove for a smoother finished appearance
- #81 is a concealed-corner profile compatible with #79 and #80 for a cleaner finished look
- LEDs mount directly to the stabilizer
- #81 can accommodate a non-lit back graphic
- White blackout is recommended in #81 for optimal light diffusion
- Compatible with acoustic panel applications

#90 & #91 1-SIDED LED SEG LIGHTBOX

- Designed for freestanding, hanging, or wall-mounted applications
- Depth: 3-5/8"
- Unlimited sizing with extendable support bars and corner stabilizers
- Available in Silver, Matte Black, and Gloss White
- Edge-lit lightbox solution engineered for bright, even illumination
- Low-profile power supplies fit cleanly within the back channel
- All electrical components are UL-listed
- Dimmable options available for greater lighting control
- Ideal for vibrant backlit graphics in retail, showroom, and interior environments
- #91 is identical to #90, but without the outside groove
- Compatible with acoustic panel applications

#143 & #144 2-SIDED LED SEG LIGHTBOX

- Designed for freestanding or hanging backlit displays
- Depth: 5-5/8"
- Available in Silver and Matte Black
- Unlimited sizing with extendable support bars and corner stabilizers
- Slim profile for a 2-sided illuminated SEG solution
- Low-profile power supplies help minimize visible shadowing within the frame
- Ideal for retail, airport, showroom, and suspended display environments
- Delivers strong double-sided visual impact with a clean finished appearance
- #144 is identical to #143, but without the outside groove

PROFILE QUICK COMPARISON

Profile	Lit	Sides	Mounting	Depth	Best Use
